All images should be provided at a resolution of at least 2400px x 1700px at 240dpi.

Welcome to Issue 218

In the new this month this TransPennine Express (TPE) whose customers are to see hundreds more seats on trains and services across the Pennines running every 15 minutes from this December, as the operator restores services while continuing to run a timetable customers can depend on.

They claim....Four express trains an hour will run between Manchester Victoria and Leeds, once again providing fast, frequent and reliable trains – as well as increased services across TPE’s network.

The change comes as train operators across the UK switch to a new timetable on December 15th.

Customers in Castleford, Normanton and Wakefield will also benefit from a new hourly service, seven days a week connecting them to Manchester and York as well as other stations along this route.

Across the TPE network, there will be an increase in seats for customers of 12 per cent – around 1300 more every day.

Other major changes include:

50 trains will run each way, every day, between Liverpool and Manchester stations (Monday to Saturday, with fewer services on Sundays). This means an increase to two services every hour between Liverpool and Manchester

Victoria. These trains will form a half-hourly express service calling only at one intermediate station (Newton-le-Willows and Lea Green alternately).

TPE will stop at Eaglescliffe for the first time, providing an hourly service.

Chester-le-Street will now receive hourly calls.

The majority of services operating between Liverpool and Cleethorpes will be six carriage trains, increasing the number of seats. This service also stops at Sheffield, Doncaster and Manchester.

More evening services connecting Manchester and Oxenholme, calling at Bolton, Preston and Lancaster.

Chris Jackson, Managing Director at TransPennine Express, said: “We’re pleased to be returning to our more historic timetable, bringing back and adding new services and additional seats which will make a real difference for our customers.

“We have seen great achievements across TPE in the past 12 months in particular, with cancellations reduced by 70% and, thanks to our customers old and new having confidence to travel with us, we have become the second fastest growing train company in the UK.

“We urge customers to check before

they travel in case there are any changes to their services.”

For more information about individual services, customers should use the ‘Check My Timetable’ feature on TPE’s website.

David Hoggarth, Head of Strategic Rail at Transport for the North said: “Following the difficult decision to temporarily step back services last year, this announcement by TransPennine Express to restore services and stabilise performance is a positive step forward. TfN will continue to work with all operators to improve reliability, re-build confidence and prepare the way for future enhancements, including the Transpennine Route Upgrade, in the North’s railway network, which is essential to help deliver sustainable, inclusive growth for our region.”

Once again, thanks for all the photos sent in this month, we really appreciate the time taken to send them to us. Until next month, stay safe.

Andy

Unique artwork celebrating Crewe unveiled at station

An art installation that celebrates Crewe has been unveiled at the town's railway station as part of a community project to engage young people in the railway. Located on platform 12, the art installation features icons from organisations and industries associated with Crewe, including the railway, Bentley Motors, renowned ice cream van manufacturers, Whitby Morrison, and Mornflake.

The artwork is made up from repurposed waste materials including bottle tops, toy parts, buttons, pens, beads and tiles. It also features brightly coloured figures representing the town's community that have been installed on the platform. The unique art pieces have been created as part of a project by Central Cheshire Buddies Scheme – a charity that supports children and young people with disabilities, as well as sibling young carers.

Titled 'Train Buddies', the project aims to give disabled children and young carers experiences linked to the railway they would not ordinarily have access to. It will see three of the charity's activity groups take the train for days out on the West Coast Main Line by the end of

March 2025 - a total of 24 journeys. Over the summer the children enjoyed trips to Blackpool to visit Blackpool Tower, the circus and Sea Life. Avanti West Coast backed the initiative through its Customer and Communities Investment Fund, which supports activities that address social needs local to its route.

Over the last four months, the children got creative in workshops at Crewe station delivered by local artist, Sue Guildford of Junk Art Creations. Sue, who specialises in repurposing discarded materials for fun art pieces worked with the charity to design a series of installations that would act as a legacy to the Train Buddies initiative.

Taryn Banks, Avanti West Coast Station Manager at Crewe, said: "We've loved welcoming Sue and Cheshire Buddies to the station to give waste materials a new lease of life and are delighted with the results! The unique artwork provides a warm welcome to those travelling to and from the town by train and is a great celebration of Crewe.

"Supporting projects that make a positive difference

to the people and places we serve is important to us at Avanti West Coast. So, we're proud to play our part in connecting disabled children and young carers to new experiences. We look forward to welcoming Cheshire Buddies for their next journey and hope they catch a glimpse of their brilliant artwork as they arrive or depart the station by train."

Stephanie Lawley of Cheshire Buddies said: "We're delighted to see the artwork in place at Crewe station. The children have worked on it for the past four months, so it's great to see it finished and in place. We're so proud of what the children have achieved with the support of Junk Art Creations. The artwork is a legacy of our Train Buddies initiative, and we hope it will be at the station for many years to come."

Reflecting on her involvement in the artwork, Sue Guildford said: "I love working with Cheshire Buddies and have completed many projects with them over the years. This project was the most challenging, fun and rewarding. My eldest son is learning disabled and has taken part in Cheshire Buddies activities, so working

with disabled children is important to me and partnering with Cheshire Buddies is a joy and privilege. It's great to be part of a legacy piece of artwork celebrating some of the iconic companies and industries associated with Crewe. It was a very proud moment to see my vision finally installed and on view for everyone to enjoy for many years to come."

Girish drives into retirement after clocking up 50 years on railway

An Avanti West Coast driver has completed the last service of his working life marking the end of his 50-year career on the railway. Driver Trainer and Assessor, Girish Jani, 67, who lives in Wembley, took to the controls of a Pendolino train for one last time on a journey from Crewe to London Euston before his retirement. The starting location and destination of his final train journey as a driver were pertinent as they have been two key places in his railway career. He clocked up many decades of his service at Euston, while Crewe is one of Avanti West Coast's Driver Training Centres where he has been based for the last 18 months. Fondly known as 'Jani' by colleagues, Girish joined the railway in September 1974 aged 17 and nine months - when 'Love Me for a Reason' by The Osmonds was top of the UK's charts and Harold Wilson was Prime Minister. He followed in the footsteps of his brothers, with one working as a train driver at London Underground for over 35 years, while the other worked for British Rail for 22 years.

Straight after leaving school, Jani began his career as a secondman (a train driver's assistant) at Stonebridge Park – a freight depot in Wembley. He progressed to a driver. Back then there was very little technology, no mobile phones and safety rules did not require hi-vis jackets to be worn on tracks.

A few years later, Jani began driving passenger services based out of London Euston. There he progressed to a mentor, instructor, and Deputy Driver Team Manager. Jani then became a Driver Team Manager – a role he held for over 30 years, which involved supporting train drivers based out of Euston.

For the last 18 months, Jani has been training the next generation of Avanti West Coast drivers in his role as Driver Trainer and Assessor at centres including Polmadie, Carlisle, Crewe and London Euston. He has helped train drivers on Avanti's fleet, as well as imparting his knowledge and experience to trainees who are new to the role.

Outside of the railway, Jani is a magistrate in London – a role he has been doing for 18 years, as he wanted to support and work with the community to make a difference. He said his roles on the railway and as a magistrate require similar skills including taking on responsibility, attention to detail, and good communication. Throughout his five decades on the railway, Jani has made some fond memories – from driving different types of traction, to feeling part of the railway family and learning new skills.

Avanti West Coast colleagues from the Driver Training Centre gave Jani a send-off at Crewe station before they travelled as passengers on his last train to London. As the Pendolino Jani was driving pulled into Euston station, it was greeted with cheers and applause from colleagues past and present who had come to celebrate his achievement and say goodbye.

"The West Coast Main Line has been my home for over half a century. It is a unique railway, and its people have always been so kind to me. I've learned so much since my early days in freight and been able share experiences with some fantastic people, as well as drive the Pendolino train, which in my opinion is a brilliant machine!" said Jani.

Reflecting on his time on the railway, he said: "I feel truly proud and privileged to have clocked up 50 years' service. It only feels like yesterday I started on my railway journey. I will miss the people, driving trains and playing my part in supporting the next generation of train drivers - I look forward to travelling on their trains one day. I'm excited to start a new chapter where I'll get to look at my bucket list for travel, continue my magistrate duties and spend quality time with my family."

Craig Fletcher, Deputy Head of Drivers at Avanti West Coast, said: "Working with Jani was invaluable when I joined Euston depot. Jani's relations and the connections he built with people over the years is testament to his personable approach. He has a unique charisma and charm - sometimes playfully cheeky that makes him memorable and a valuable leader. As one of the longest serving Driver Managers at London Euston, Jani's motivation was the success of the driver function at the depot. He always had a willingness to go above and beyond for those he worked with."

Caledonian Sleeper

On October 2nd, Class 92 034 passes through Stafford with empty stock from the overnight sleeper to Scotland, working from London Euston - Edinburgh. Services had been disrupted due to bad weather. *Michael Lynam*

FREIGHTLINER LAUNCH NEW TILBURY TO MANCHESTER SERVICE DRIVING MODAL SHIFT AND UTILISING NEWLY LAUNCHED RAIL FREIGHT INCENTIVE

On September 30th, Freightliner, along with several industry partners, celebrated the launch of the new Tilbury2 to Manchester Trafford Park intermodal rail freight service. This new service, transporting containers arriving from Europe, is particularly significant as it was made possible by the Access Charge Discount scheme, recently launched by Network Rail to support the launch of new services and encourage modal shift to rail.

“We are thrilled to see this new service up and running. The Access Charge Discount scheme is an important initiative to deliver modal shift and achieve industry growth targets. We are pleased that our new daily train for P&O Ferrymasters is the first service to use the new Access Charge Discount scheme, enabling us to deliver our customers’ goods more sustainably.” Tim Shoveller Freightliner CEO.

This service is delivering significant modal shift removing HGVs from some of Britain’s busiest motorways and cutting carbon emissions by 76% compared to road. The launch of the service was made possible by the new Network Rail Access Charge Discount scheme, which provides a period of time where charges are waived, to grow volumes and enable the service to become financially sustainable.

John Freyne, Director Intermodal at P&O Ferrymasters said, “We have successfully implemented numerous rail corridors across Europe in collaboration with our valued customers. We are pleased that the industry has worked collaboratively to make this new UK service a reality. We expect the roundtrip train to take around 10,000 trucks off busy UK roads annually, enabling us to remove thousands of tonnes of carbon emissions from

the supply chains of our customers. Adding a UK rail service to our extensive European Multimodal network has been a key goal for us, and we are delighted that the new Network Rail scheme has made this possible.”

The new scheme, announced by Network Rail, offers 6 months free track access charges to support the launch of a new rail services, helping to drive modal shift and incentivise businesses to use rail freight. This new Freightliner service will depart from Tilbury2, one of London’s major ports, to Manchester Trafford Park running 5 days a week – it is the first service to utilise Network Rail’s new scheme.

Paul Dale, Chief Operating Officer at Forth Ports, commented: “Green rail logistics is transforming our customers’ supply chains and this new service from our

rail terminal in Tilbury2 is a prime example. The partnership approach between Freightliner, P&O Ferrymasters and Forth Ports has created a tailored solution that will help drive sustainability up-and-down this important British supply chain.”

Jen Craft, MP for Thurrock, said: “Rail is central to the growth of the green economy and I’m pleased to see the proactive steps taken by Network Rail, Forth Ports and its partners to deliver this daily rail service carrying food and other essentials across the country.”

Freightliner, along with industry partners, are committed to using the development of Network Rail’s new discount scheme as a springboard for a policy framework that delivers growth and drives modal shift into the future.

▶ The Salford Hope Street to Peak Forest empty hoppers continues to be diverted following the line closure at Audenshaw and on October 19th, the service is seen passing Reddish North hauled by unique liveried Class 66 783.

Lee Stanford

▶ Class 92 020 'Billy Stirling' runs light engine through Northampton as 0Z14 12:30 Crewe T.M.D. (E) to Wembley InterCity Depot on October 3rd. *Derek Elston*

▶ Class 66 702 passes Altrincham on October 10th with an aggregates train from Hindlow - Small Heath. *Michael Lynam*

GBRf

Class 66 718 'Peter Lord Hendy of Richmond Hill of Imber in the County of Wiltshire' leads 6055 14:40 Daventry GBRf to Dollands Moor Sidings through Northampton on October 3rd. *Derek Elston*

▶ Class 66711 passes through Stafford on October 2nd in charge of a container train from Hams Hall - Mossend. *Michael Lynam*

▶ On a dull autumn November 1st, unique liveried Class 60 026 passes through Stockport with a Liverpool to Drax Biomass working. *Lee Stanford*

▶ Class 47 739 working 5Q87 Long Marston to Wimbledon Depot with South Western Railway's Class 701052 heads through Swindon on October 23rd, running 53 minutes late due to a points failure at Worcester. *Colin Pidgeon*

GB RAILFREIGHT ACHIEVES NEW HIGH IN GRESB SUSTAINABILITY SCORE

Decarbonising our national supply chains has long been a key pillar of GB Railfreight's business strategy. Central to this has been working with Global Real Estate Sustainability Benchmark (GRESB) to independently measure the business' progress in environmental, social, and governance (ESG) performance. GBRf have completed their assessment for 2024, and have been awarded 94/100 with a 4-star rating, placing them above both the peer group average of 86/100 and the total GRESB average of 86/100. This demonstrates continuous progress since their first submission in 2022, when they scored 72/100 with a 2-star rating demonstrating that the actions the business is taking are making a significant difference.

GRESB is a mission-driven organisation providing transparent ESG data to financial markets. Their assessments are guided by global sustainability goals, including the Paris Climate Agreement and the UN Sustainable Development Goals, making this a highly respected and rigorous benchmark for environmental and social responsibility.

Karl Goulding-Davis, Chief Financial Officer – GB Railfreight; said "This result from GRESB, demonstrates that the actions we are taking as a business are making a significant difference in our ambitions to be a truly sustainable organisation. Over the last 12 months, we've introduced initiatives including introducing lower

carbon traction to our rolling stock fleet, energy monitoring and taking the next steps on our path to ensuring all our depots are fully sustainable. It's fantastic to see this recognised in this industry leading result."

Alexia Savva, Head of Responsible Investment, Infracapital; said "We are pleased that GRESB has recognised GBRf's implementation of business relevant initiatives that aspire to generate environmental and social outcomes. Decarbonising the transport sector is critical to the delivery of national and global net-zero targets and GBRf continues to make strides in this space. We look forward to continuing to work with the business to enhance such outcomes going forward."

What is GRESB?

GRESB is a mission-driven organisation providing transparent ESG data to financial markets. Their assessments are guided by global sustainability goals, including the Paris Climate Agreement and the UN Sustainable Development Goals, making this a highly respected and rigorous benchmark for environmental and social responsibility.

This improvement in their score highlights the commitment to sustainability across all aspects of their operations, and it's a positive step forward in meeting long-term ESG goals.

On October 22nd, Class 166 212 with a Paignton to Exmouth service is seen heading along Dawlish sea wall. *Allison Twycross*

LNER Launches Poppy Train 'Thank You' In Recognition Of Those Who Have Served

LNER is proud to name an Azuma train in recognition of those who have served and continue to serve. 'Thank You' is joining the fleet in time for Remembrance Day.

Wrapped in a poppy design, Azuma unit 800111 will travel the East Coast Main Line as a poignant reminder of those who gave their tomorrow for our today.

Pictured alongside LNER's special liveried InterCity 225 'For the Fallen' (Class 91 No. 91111) which is dedicated to those who lost their lives during World War One, 'Thank You' was welcomed into service by former military personnel who now work for LNER. Former Royal Navy Petty Officer Helen Firth and Royal Air Force Senior Aircraftman Will Warwick, were proud to officially launch the special named train at London King's Cross ahead of its journey to Aberdeen.

LNER has a proud and long-established relationship with the Armed Forces. The close relationship continues to the current day, with ex-service personnel working across every department of the train operator's business, from directors to frontline colleagues, cyber security and train drivers.

James Downey, Director of Business Services, and Executive sponsor of LNER's veterans' community, said: "As a signatory of the Armed Forces covenant, we feel it is incredibly important to show our debt of gratitude to those who have served and continue to do so. We are proud that Azuma 800111 will carry our message of thanks. We hope this special livery acts as a moving reminder to all who see 'Thank You' on our route."

Work Starts at York Station to Create LNER's Latest Family Lounge

Families travelling to and from York station to destinations up and down the East Coast Main Line will soon have a dedicated space designed to keep children entertained and parents and carers relaxed.

Work has started to create a new LNER Family Lounge inside the station which will feature a children's play area based on York's historic walls, beach huts with tabletop games, wall games, soft flooring and crawl spaces, and specially commissioned murals focusing on York's famous landmarks and the city through the ages.

There will be plenty of space for parents and carers to sit back and relax with sofas, wooden bench seating, and coffee tables, as well as a comfortable space for breastfeeding.

Work is due to be completed in December 2024, allowing families travelling for the Christmas break to be able to explore the new space before their train departs or once

they arrive in York.

The station's new Family Lounge, which is open to passengers travelling with any operator, will become the second in the LNER portfolio. Each year, thousands of customers enjoy the UK rail network's first dedicated lounge for families at London King's Cross which opened in October 2022.

Colette Casey, LNER's Customer Experience Director, said: "As a parent, I'm delighted that LNER is introducing Family Lounges with a new space in York our latest addition.

"York is a major hub station for us with millions of customers starting or ending their journeys here each year. We constantly strive to deliver improved experiences for all our customers as they travel with us and providing these new facilities is bound to aid that.

"We want families to see train travel as an option for them. We hope that this new lounge will provide fun and entertainment for children and a space to relax for parents and carers."

To ensure LNER's Family Lounges are of benefit to families, the train operator has previously consulted with the Campaign for Family Friendly Trains, a group of parents and carers working for better facilities for children and their families on the UK rail network.

A spokesperson for the campaign said: "We are pleased to see LNER power ahead with the introduction of a new family lounge at York station, offering a welcoming and comfortable space for families travelling by train.

"The popularity of the family lounge at King's Cross station highlights just how valuable these facilities are, and we congratulate LNER on expanding this initiative to another station in its network.

"We hope this sets a positive trend for other train operators to follow and leads to more family-friendly facilities across the UK."

On October 16th, Class 37 418 'An Comunn Gadheatach' leads 'Caroline' through Reddish South with the 08:49 Crewe to Crewe via Liverpool and Blackburn. *Lee Stanford*

Going Underground

District line driving car No. 21552 is seen on the approach to West Ham with a service to Ealing Broadway on a sunny October 23rd. *Barry Longson*

Network Rail's MPV No. DR98902 heads south at Golbourne Junction, with a Wigan Springs Branch to Warrington and return RHTT working on October 5th. *Paul Senior*

Greater Anglia achieves Investors in People Gold status

Greater Anglia has been awarded the prestigious 'Investors in People' Gold status in recognition of its progressive approach to business improvement through its people. The organisation achieved a Gold Award, which demonstrates that they have gone beyond the requirements needed to achieve the standard Investors in People status and have taken a forward thinking and expansive approach to cascading best practice through every level of the organisation. Only 28% of organisations achieve gold status and Greater Anglia was praised for leadership, collaboration, and communication with colleagues.

Judges commended the train operator for supporting its workforce, delivering continuous performance, and creating sustainable success. The company was last assessed in 2021, when it was awarded silver status.

Katy Bucknell, HR Director, Greater Anglia, said: "I am immensely proud that Greater Anglia has achieved Gold status for Investors in People. This recognition is testament to the incredible efforts of our team, who are fundamental

to our success. Our people are at the core of everything we do, and being acknowledged for our commitment to their growth and development is fantastic. As we move forward, we will continue to build on this positive culture, striving to get even better and create an environment that attracts and nurtures the very best talent."

Paul Devoy, CEO of Investors in People, said: "We'd like to congratulate Greater Anglia. Gold accreditation for Investors in People is a fantastic effort for any organisation, and places Greater Anglia in fine company with a host of organisations that understand the value of people."

The recognition follows on from Greater Anglia winning the Passenger Operator of the Year award at the National Rail Awards 2024, held last month. The GA team were also Highly Commended as runners up in the Rail Operator of the Year award at the National Transport Awards 2024 and were runners up in the Passenger Transport Operator of the Year award at the CILT (Chartered Institute of Logistic and Transport) Awards 2024.

Fares Advice with RailUK

This month more questions and answers on the complex ticketing system of Britain's Railways.

Unnecessary reservation tickets

Q: I have an off peak day return ticket, B3 restriction (irrelevant as I'm travelling on a Saturday), and for some reason the ticket machine has chucked four seat reservation 'tickets' at me which I didn't ask for and don't want, so am going to chuck them in the bin. They aren't even for specific seats. Given my ticket is valid on any services is there any reason why I should keep hold of them? They seem utterly pointless and a waste of cardboard.

A: Is it a "compulsory reservation" TOC? Or sometimes the sales sites issue them unnecessarily. Either way no you don't need them if you have a walk-up ticket. A few weeks ago I booked tickets via the forum booking site to Horsham, travelling only on GTR and TfL. Neither operators offer seat reservations. As there were no e-tickets available, I printed out the tickets at the TVM, where it proceeded to give me an extra reservation ticket for each leg of the journey, with each of them simply stating my 'reserved' train (the ticket was flexible?) and 'no seats reserved on this train'. Wasted 3-4 pieces of cardboard.

Alternative routes during engineering works?

Q: Looking to travel from Clapham Junction to Barnham on Saturday November 16th.

There's engineering work that day so there are no Southern services at Clapham Junction.

The quickest / simplest route appears to be to travel via Havant.

However, National Rail Enquiries says that there are no fares available for that routing, presumably because ordinarily it would be a slower, more circuitous route.

Would a regular cheap day return from Clapham Junction to Barham be valid on the Havant route, due to the engineering works that day?

Or will I need a more complex set of tickets?

A: Clapham Junction to Barnham is not valid via Havant, as you have found, and there's no easement permitting it specially on November 16th.

You could hope for the best, or you could get a day return to Chichester (which is valid via Havant) plus a day return from Chichester to Barnham. This may be more expensive of course.

It looks like the fares from Clapham Junction to Barnham and Chichester are the same, so it's the £5.60 extra for the Chichester-Barnham ticket.

It's not necessarily "reasonable" to be made to pay more in this way, but now that routeing is codified in the way that it is, I've given you the 'official' position I think. Others may come up with a better alternative.

Changing at Epsom and Horsham appears to be valid, avoiding the bus to Croydon.

Ticket Advice for All

Advice on rail ticketing is available on railforums.co.uk in the 'Fares, Tickets & Routeing' section. We believe this to be the best source of UK rail fares advice available anywhere, as we have a team of people who are familiar with the complex rail fares system who can help you. Never pay over the odds again, and ask us if you need help! See you there!

'Cockney Singalong' event train delights Essex passengers

A good old-fashioned knees up had rail passengers smiling when Tom Carradine boarded a Greater Anglia train with his Ol' Joanna for a cockney singalong.

The one-off special train, organised by the Essex and South Suffolk Community Rail Partnership, travelled from Colchester to Walton-on-the-Naze on September 28th and saw passengers treated to old time music hall songs, frivolity, and a bit of rhyming slang complete with a real piano on board.

Tom Carradine, a pianist in the group Champagne Charlie and the Bubbly Boys and regular accompanist on the London cabaret circuit, launched his Cockney Singalong show to capture the flavour and atmosphere of a good old-fashioned knees up in the grand Cockney tradition and recreate it for audiences young and old.

Since its launch in 2014, Carradine's Cockney Sing-a-long has rapidly become a fixture on the UK's thriving vintage scene, playing sell-out dates in the main auditorium at Wilton's, every Thursday at Mr Fogg's Tavern, and for vintage events, corporate events, and private parties across the country.

Jane Stewart, Community Rail Partnership Officer, said: "It is great to have Tom as part of our events programme. The Cockney Singalong event is always really popular and is certainly a bit different, but it marries really well with the nostalgia and excitement of a train trip.

"Our thanks to Tom for a really fun evening full of songs that kept people smiling and singing from beginning to end and thanks to Greater Anglia for supporting the event."

Greater Anglia's Customer and Community Engagement Manager, Alan Neville, said: "We are really grateful to the Essex & South Suffolk CRP for hosting another fantastic event that encourages people to come and take a trip by train.

"They are always coming up with new and exciting ways to promote sustainable, healthier travel for all and it was a pleasure to see so many people having such a great time on board."

Greater Anglia unveils refurbished canopy at Lowestoft station in Suffolk

Passengers at Lowestoft station will now be greeted by a smart, rejuvenated canopy following a three-month refurbishment programme by Greater Anglia.

The train operator for the East of England, Greater Anglia, has unveiled the restored canopy at Lowestoft station, giving the Suffolk station entrance a new lease of life. Passengers at the fourth busiest station in Suffolk will now be greeted by a newly refurbished awnings as a result of a project delivered by contractor Capel C.S Ltd who have enhanced both the structural integrity and aesthetic appeal of the front of the station.

The recently refreshed canopy retains the existing features of the original canopy but has been refurbished

with a GRP material (fibreglass), to ensure that it can easily be maintained and is future-proof. Some of the original timber was also used alongside the incorporation of the original spandrels [brackets]. The canopy was painted with a heritage livery to match the wider station colour scheme.

The old roof covering has also been replaced with a new EPDM rubber roof membrane laying that ensures superior weather resistance and longevity. In addition, the canopy now has a man-safe system that was designed and installed to mitigate any fall from height when inspection and maintenance is required.

Brick and stone restoration has also been undertaken as part of the project to improve the front elevation of the building. Defected structural timbers have been replaced and additional supports have been installed to improve future maintenance.

As part of the project, Greater Anglia successfully secured funding from the Railway Heritage Trust. This additional funding aided the cost of some of the mouldings, painting works, and some stone repairs.

Simone Bailey, Greater Anglia's Director of Asset Management, said: "Lowestoft station has a rich history, and we are pleased to deliver a smart, refurbished and restored entrance that will enhance the experience for

passengers. It was really important that we preserved the original look of the entrance, and I am pleased that, through our contractor Capel C.S Ltd, we have delivered an upgraded canopy that is fit for a station with such a historical significance."

The station buildings were extended in 1903 with the opening of the Lowestoft to Yarmouth line with the original canopy dating back to 1855 having been relocated to its current position. At the time, both the Great Eastern Railway and Midland Railway had ticket offices at the station with the Lowestoft to Yarmouth line being operated by the Midland and Great Northern Joint Railway.

Green light for 30 acre industrial-led logistics campus at Bow Goods Yard

Currently an isolated site, large parts are not accessible to the local community, and a series of green open spaces will be created, delivering 200,000 sq ft of new public open space. New public realm will improve the Greenway, creating new pedestrian and cycle routes alongside the introduction of 150 trees, green walls and green roofs.

Robin Dobson, Group Property Director at Network Rail, said: "Transforming this strategically underutilised freight site into the largest industrial and logistics campus that serves the whole of East London is central to expanding rail freight capacity and supporting the capital's logistics market."

An outline masterplan to regenerate over 30 acres of brownfield land at Bow Goods Yard, East London, into a rail freight campus and last mile logistics hub has been unanimously approved by the London Legacy Development Corporation. Bow Goods Yard is the final parcel of London 2012 Olympic and Paralympic legacy land to be unlocked and is Network Rail Property's first independent planning submission.

Under the industrial-led masterplan, up to 3 million sq ft of floorspace will be created, including heavy and light industrial space. Bow Goods Yard has the potential to deliver a new centralised hub for Network Rail, accelerating London's transition to green freight future. Taking up to 90,000 HGV movements a year away from the national road network, the masterplan will cut congestion and emissions.

Additionally, a range of leisure uses are proposed, with the flexibility for up to 350,000 sq ft destination leisure supported by 35,000 sq ft food and beverage alongside 55,000 sq ft of sports pitches to complement existing facilities on the Queen Elizabeth Olympic Park.

Bow Goods Yard is vital to London's construction sector, supplying over a million tonnes of aggregates annually. Rail freight contributes £2.5bn to the UK economy, and hubs such as Bow Goods Yard will be crucial to expanding sustainable freight as businesses switch to rail.

The development improves rail freight capacity and efficiency by consolidating operations, enclosing and screening the concrete-batching facility, which enables an integrated last mile logistics hub to be brought forward, with the scheme creating up to 5,000 new jobs.

"The approval of this masterplan submitted by Network Rail Property is a major milestone in repositioning the property business. It marks our ambition to drive growth and investment across our brownfield estate, taking the lead on complex projects to ensure we deliver the widest mix of commercial and social opportunities. By working closely with local communities and businesses, we are ensuring sites like Bow Goods Yard will support the local area for generations to come."

Blazej Czuba, Urban Studio Lead at Maccreanor Lavington, said: "It has been an incredible journey for us developing a project that secures the industrial capacity of the site while positively responding to its unique context in the middle of the Olympic regeneration area. The result is a masterplan showing that heavy industry can successfully co-exist with other functions in a city, and that many industrial uses can be integrated into the street fabric, instead of being relegated to an out-of-town industrial estate. But this is not just an industrial project. The leisure and community component will expand what the Queen Elizabeth Olympic Park has to offer, capitalising on London's burgeoning experience economy".

"This project would not have happened like this without extensive early-stage community engagement that meaningfully evolved the project brief. We had over 700 active community participants across 45 events and a near-unanimous support for the proposed designs"

Loco Fleet List Ten

This publication gives a reference to all the Diesel & Electric Locomotives which have operated on Britain's railways from the early experimental era right up until the present day.

This information has been put together to give an easy reference to the numbering and official naming of each locomotive and includes all withdrawn, preserved and currently operating locos in TOPS classification order.

Features:

- Diesel Locomotives
- DC Electric & Electro-Diesel Locos
- AC Electric & Bi-Mode Locos
- Eurotunnel Locomotives
- Unclassified Locomotives

Loco Fleet List Ten is available via mail order for just £12.99 plus £1.99 P&P with a cheque or postal order made payable to: L Miller and sent to: 7 Wood Street, Warrington, WA1 3AY or using Paypal when visiting the Loco Fleet Shop website.

Web: www.locofleetshop.co.uk Email: lee@locofleetshop.co.uk

This special anniversary edition has undergone a complete rewrite to include scrappage dates, locations and allocations of all preserved and operational locomotives now in a perfect bound book

The 'Euston rush' on its way out as early train boarding introduced

Network Rail and its train operating partners are introducing a trial of earlier boarding of Avanti West Coast and London Northwestern Railway train services to improve passengers' experience at Euston station and significantly reduce instances of the 'Euston rush'.

The announcement comes just weeks after Network Rail and the Department for Transport announced a five-point plan to deliver a better passenger experience at the station, with Transport Secretary Louise Haigh tasking the station's teams to look again at how Euston works on a day-to-day basis and make immediate improvements where possible.

From October 28th:

Around 40% of Avanti West Coast services will be boarded 20 minutes before departure, with more services being added in the weeks ahead to the majority of services (around 55%) in the run-up to Christmas.

'Continuous boarding' of London Northwestern Railway's Birmingham services introduced from October 21st is also here to stay where passengers are invited to

board their service as soon as the preceding service has departed. The speeding up of passenger boarding and improved flows through the station have been made possible by the collaboration between Network Rail and the train operating companies to simplify cross-industry operational processes.

Gary Walsh, director for Network Rail's West Coast South route, said: "Getting passengers to their services in good time is at the heart of our improvements at Euston, and today's changes will tackle that issue head-on. Taking quick and effective action is at the core of our five-point plan which I'm pleased to say is starting to deliver for our passengers at London Euston station."

Network Rail has also convened its first rail industry summit to give passenger user groups and government an update on progress on Euston station's five-point improvement plan*.

The event saw Rail Minister, Lord Hendy and representatives from the DfT, Avanti West Coast, London Northwestern Railway, TfL, the ORR, British Transport

Police, London TravelWatch and Transport Focus join Network Rail staff for a fact-finding visit of passenger operations, following the recent announcement of the five-point plan to improve passenger experience at the station.

Transport Secretary Louise Haigh, said: "I am pleased to see immediate improvements being made at Euston Station to reduce the risk of overcrowding, drive up standards and deliver a better experience for passengers. For too long, Euston station simply has not been good enough. That's why I have tasked Network Rail and operators with delivering a clear plan to alleviate some of the issues passengers are facing while we work on a long-term solution for the station."

Cheryl Fox, interim customer experience director at Avanti West Coast, said: "We know the travelling experience for our customers at Euston has fallen below the standards they should rightly expect. This is why we welcome any steps to make improvements. We will continue to work alongside Network Rail as well as our partners on this trial and other measures, with the aim

of making journeys at the station more comfortable for those travelling on the West Coast main line."

Jonny Wiseman, customer experience director for London Northwestern Railway, said: "We are pleased to be working together with Network Rail and other train operators to improve the travelling experience for our customers at Euston. We'll be monitoring the impact of these changes closely as we continue working with partners to make the process of boarding trains smoother across the station."

While the future of the advertising board remains under review, rail industry partners discussed its potential to be used for passenger information. Other actions being explored include making all the information desks more visible together in one place, the further expansion of concourse waiting space and a full review of all station signage. As well as updating on Network Rail's short-term plans at Euston, industry partners also took the opportunity to discuss the long-term aspirations to regenerate the Euston campus in future.

National Rail

MPVs Nos. DR98905 and DR98955 pass through Coventry on October 30th working RHTT circuit 3S03 04:18 Kings Norton On Track Plant Depot to Kings Norton On Track Plant Depot.

Community volunteers win recognition for helping to care for rail stations

Greater Anglia has recognised volunteers in Cambridgeshire and Hertfordshire who have been working with the train operator to help care for their local rail stations.

At the train operator's annual Station Adoption Awards, the best achievements of the last 12 months from amongst its 330-strong team of volunteer station adopters were formally recognised.

Great effort and dedication was evident at all adopted stations by the volunteers, who work with Greater Anglia to improve their local stations for the benefit of the community, but particularly impressive progress or initiatives were highlighted across 11 categories including best station, best adopter group, environmental and innovation award, and community involvement award.

Keith Reast, adopter at Broxbourne station, received the Judges' Special Award for sustained support for station adoption over many years. More recently, when wider

station upgrade works meant the land available for station adoption changed, he made the most of the opportunity to create a new garden working in conjunction with the New River Line Community Rail Partnership, schoolchildren and the wider community.

Dullingham's station adopter group won the award for the Best Small Station for their work to transform the areas alongside the platforms into gardens with stunning floral displays which not only delight passengers but have created a haven for local wildlife. Last year, the station was accredited as 'wildlife friendly' under Greater Anglia's Wildlife Friendly Stations accreditation scheme.

Geoff Howes, adopter at Whittlesea station won the Community Involvement Award for work to promote the railway locally and put the station at the heart of its community.

Alan Neville, Greater Anglia's Customer and Community Engagement Manager, said,

"We are so grateful to our amazing team of station adopters for everything they are achieving at their stations – and their work is loved and appreciated by the community too.

"The adopters know their stations and the needs of their community well and we are happy to support their aims through small grants and facilitating improvements.

"I would like to thank them for everything they do to help make their stations welcoming for passengers and a real asset to the community."

Other winners and highly commended initiatives in Cambridgeshire and Hertfordshire included:

Manea – highly commended, Most Improved Station

St Margarets – highly commended, Best Staffed Station

Ely - highly commended, Best tubs and Hanging Baskets

MickHood, Whittlesford - highly commended, Best Personal Contribution

Greater Anglia's Station Adoption scheme enables individuals or groups to adopt their local railway station and contribute to its use and welfare for the benefit of their community. Station adopters work with Greater Anglia and, on some branch lines, also with the local community rail partnership, to bring about improvements or care for gardens and floral displays to benefit local wildlife and make stations more welcoming.

Greater Anglia provides funding to help station adopters cover the costs of small projects, such as the creation of station gardens and/or to purchase materials to help improve the station environment.

The voluntary scheme, which Anglia Railways introduced in 2003, built on similar

initiatives elsewhere in the UK, to improve lines of communication between train operators and station users, but extended it to involve station adopters in playing an active role in keeping stations looking good – initially through beautiful and inventive gardening projects and station presentation improvements.

Over the years, adopters have expanded their activities to encompass wildlife-friendly initiatives, creative community art projects, local promotion of the railway and participation in station 'health checks', as well as being the eyes and ears of their station and encouraging links between the station and local communities.

£21m investment at Salford Crescent station to improve train services across the North West

Passengers in Salford are being advised of Network Rail work to build a third platform at Salford Crescent station.

The new, extra platform will improve passenger flow and reduce train delays by allowing more flexibility for trains travelling through central Manchester and across the country.

Salford Crescent station is on the busy Manchester to Preston line, with services calling from across the North West into Manchester and Manchester Airport.

In 2022/23 the station handled almost 1.2 million entries and exits making it one of the busiest stations in Greater Manchester.

The platform will give signallers more options to ease “traffic jams” through the station and through the busy central Manchester rail network.

To carry out the work, Salford Crescent station will close for several weekends between March and September 2025. The work will be complete in early 2026.

Simon Elliott, Head of Rail at TfGM, said: “As part of Transport for Greater Manchester’s (TfGM) ongoing commitment to enhancing the transport infrastructure across Greater Manchester, we welcome the significant improvement and investment planned with Network Rail’s work at Salford Crescent and TfGM’s at Salford Central.

“This investment in Salford will not only improve the passenger experience but also contribute to a more reliable and connected network for everyone. Together, these upgrades are a vital part of our wider ambition to improve our integrated and sustainable transport system for the future.”

Network Rail MPVs Nos. DR98912 and DR 98962 pass Plumley on October 25th whilst working a north west RHTT diagram. *Jeff Nicholls*

New footbridge for picturesque Horton-in-Ribblesdale station

The first phase of a major accessibility upgrade for passengers in North Yorkshire is completed. A new footbridge has been installed as part of a multi-million-pound investment to make Horton-in-Ribblesdale station safer and more accessible. The station, which is on the Settle to Carlisle line, is close to Pen-y-Ghent, a fell that features in the Yorkshire Three Peaks walk.

Previously, passengers and walkers were required to cross the tracks over a foot crossing. The bridge forms the new public right of way, offering a safer alternative to crossing the railway at ground level. A temporary crossing is in place at the north of the station while the work to install lifts is carried out. This is expected to be completed by next summer (2025).

Rory Kingdon, principal programme sponsor for Network Rail said: “The work to install a bridge and lifts at Horton-in-Ribblesdale station means a safer experience for passengers and people embarking on the

Yorkshire Three Peaks walk.

“The bridge has been designed to complement the picturesque landscape it sits within, to celebrate the rich railway heritage along the Settle to Carlisle line.

“From Summer 2025, Horton-in-Ribblesdale station will be step-free, meaning it will be much more accessible for everyone.”

£1m of the funding for this project comes from the Department for Transport’s Access for All programme. The station is managed by train operator, Northern.

Local Transport Minister Simon Lightwood said: “This new bridge at Horton-in-Ribblesdale station rightly gives everyone the chance to experience the idyllic scenery the area has to offer.

“Our transport systems should be truly accessible and inclusive for everyone, and championing the rights of people with

disabilities is at the forefront of our plans to overhaul the railways.”

Kerry Peters, regional director for Northern, said: “We are working hard, both here at Northern and with external industry partners, to improve accessibility at our stations – including Horton-in-Ribblesdale. The new bridge and lifts will make a real difference to the travel experience of people visiting the area and we look forward to the work being complete and available for customers to use.”

Julian Smith, MP for Skipton and Ripon, said: “It’s great to see investment going towards improving safety for passengers and walkers in this wonderful area. I’m pleased that the project keeps accessibility in mind too.”

First train completes test run between Oxford and Milton Keynes for East West Rail

A key milestone for “Connection Stage One” of the East West Rail project was reached on October 21st after a test train successfully completed its first run between Oxford and Milton Keynes. Network Rail worked with its partners at Chiltern Railways to operate the first train over the newly rebuilt section of the line between Bicester and Bletchley as part of testing on the route. This work brings the rail line a step closer to reopening to passengers for the first time in nearly 60 years.

Departing from Oxford station at 9.43am, a Chiltern Class 168 train made a full journey along the line, travelling via Bicester, Winslow and Bletchley before arriving at Milton Keynes Central at 10.25am. The journey along the entire route took 42 minutes to

complete, with the train reaching the full line speed of 100mph on several sections of line.

Christian Irwin, Network Rail’s Director of Capital Delivery, said: “Today is a huge milestone for the East West Rail project. I am incredibly proud of the partnership between Network Rail, our East West Rail Alliance supply chain partners, the DfT, EWR Company and Chiltern Railways, in successfully completing the construction and entry into service of the new railway between Bicester and Bletchley. The running of our first test train today is a huge achievement and brings us one step closer to restoring train services between Oxford and Milton Keynes for passengers.”

Rianna Stanwell, Programme Director at

Chiltern Railways, said: “I am delighted that Chiltern will be running the first series of test trains between Oxford and Milton Keynes. Working with colleagues at Network Rail and the EWR Alliance this important step in the programme will ensure the infrastructure is ready for passenger service in the future.”

David Hughes, CEO of East West Railway Company, said: “This is a fantastic achievement and an extremely proud moment for everyone here at East West Rail. I would like to thank all our colleagues at the East West Rail Alliance who have worked so hard to rebuild this railway and in particular, our local communities for their continued patience and understanding during the construction works. We can all now look forward to passenger services beginning

next year and delivering the improved connectivity which this region so desperately needs.”

Connecting communities

The event not only marks the first time a train was able to use this section of the new railway line, but also a major stage of the East West Rail project which is planning to deliver transport connections for communities between Oxford and Cambridge.

Connection Stage One of the project includes the introduction of services from Oxford to Bletchley and Milton Keynes with the aim of the first passenger services starting in 2025. Services will better connect passengers and will have the potential to help unlock economic growth and create

new opportunities across the region.

Looking ahead

Chiltern Railways is supporting both Network Rail and the East West Rail Alliance which is a partnership between AtkinsRéalis, Laing O’Rourke, VolkerRail, and Network Rail, by running test trains as part of technical preparations to open the line.

Testing and training will now take place over the coming months and the project remains on track to begin passenger services in 2025. Further test runs, supported by Chiltern Railways, will continue to ensure the safety and reliability of the new infrastructure.

From bin to cup: Network Rail tracks the journey of a coffee cup from its station bins as part of new recycling effort to divert 100% of all waste from landfill

Network Rail has teamed up with The Green Block to launch a new initiative aimed at boosting its station recycling rates to 95% and diverting 100% of waste from landfill.

Since 2020, Network Rail has been trialling The Green Block’s patented and innovative Mobile Segregation Unit (MSU) which manually segregates waste on site into its recyclable commodities whilst capturing accurate and digital data, once rubbish from trains, public bins and retailers in stations has been collected.

The MSU is based at London Victoria station and has enabled Network Rail to recycle over 7,000 tonnes of waste from London Victoria since the trial began. Over a 12-month period, this recycling technology is expected to reduce Network Rail’s carbon footprint at London Victoria by 121 tonnes – the equivalent weight of a blue whale.

The success of the trial has seen two further MSUs installed at London Bridge and London Waterloo stations

which will recycle waste from across Network Rail’s London managed stations**. It is estimated 1,500 coffee cups are segregated, baled and recycled per day across these three stations alone. This is approximately 42,000 coffee cups every four weeks. Since December 2023, the increased recycling rates has also generated Network Rail £10,000, money earned from recycled waste from across its London managed stations which is being reinvested back into the railway. It has also created 18 local and sustainable jobs for the local community.

During National Recycling Week (October 14th -18th), Network Rail has rolled out 60 new 1,100 litre bins at London Victoria station which all have a QR code for passengers to follow the journey of their coffee cup as it is recycled. These new bins also provide a potential industry-first sponsorship opportunity to create a commercial benefit that both increases revenue for the railway and reduces the cost of managing waste to the taxpayer.

Working closely with train operators and retailers, all

waste producers have coded bins or bags so all rubbish and recycling is weighed and tracked in real time using proprietary software called Plaza, so the industry knows exactly how much waste is being generated, who is producing it and exactly where it ends up.

From April 2025, it will be mandatory for all organisations to digitally track and keep real-time records of where the waste comes from and how and when it is disposed. This initiative means Network Rail is compliant five years early.

Karin Skelton, Network Rail’s Sustainability Programme Manager, said: “We run almost a third of Britain’s rail services in the Southern Region - that’s 700 million passenger journeys every year, each one with their own individual story, each one relying on us. We’ve got a fantastic opportunity to do our job in a way that minimises our impact on the environment, and we’re absolutely committed to being cleaner, greener and more socially responsible. We produce thousands of tonnes of waste every year at our big London stations,

so The Green Block partnership means we’ve been able to significantly improve our recycling rates to over 90%. But we’re committed to doing even more and are aiming to reach 95%, as well as eradicating the waste we send to landfill. The best thing about this project is that our passengers don’t need to change a thing.”

Josh Katz, General Manager of the MSU division at The Green Block (TGB), said: “At TGB we are committed to delivering safe and sustainable solutions. We are delighted to be supporting Network Rail in their sustainability journey, with the introduction of the globally-recognised Mobile Segregation Unit (MSU) and its real-time data tracking through the Plaza system, leading the way within the transportation industry.”

*Based on 2023/24 data

**Across Network Rail’s Southern Region, Network Rail’s managed stations include London Victoria, London Waterloo, London Bridge, London Charing Cross, London Cannon Street, Clapham Junction and Guildford.

Network Rail and White Cliffs Countryside Partnership hire some unusual new staff – with hooves instead of hard hats

They're not the usual employees you'd expect a railway to hire, but Network Rail's latest recruits, a herd (or "trip") of goats, have taken to their new jobs with great enthusiasm, helping to restore chalk grassland near – but not on – tracks in Folkestone.

The unique landscape of Folkestone Warren surrounds the railway between Folkestone and Dover, with its rare chalk grassland habitat supporting a variety of unusual species of plants and animals. Many of the rarer species of plant, such as chalk eyebright require open ground to thrive, and up until recently the only way of providing that was for staff to use brushcutters to cut back the encroaching brambles and scrubs.

While that's still a crucial part of the area's management, a trip of Boer goats has joined an existing herd of cows to graze parts of the Warren that aren't easily accessible to staff and volunteers.

The land and the cliffs at Folkestone Warren are a designated Site of Special Scientific Interest and local nature reserve, and is managed by the White Cliffs Countryside

Partnership on behalf of Network Rail.

Steff D'Agorne from the White Cliffs Countryside Project said: "We're delighted to welcome our goats to this Nature Reserve. Historically, Folkestone Warren was a much more open landscape, with a mixture of chalk grassland, scrub and woodland and we're hoping the goats will help restore some of this diversity and encourage some of the rare species that occur at the Warren to colonise new areas. We know that diverse habitats are much more resilient, so the goats should help the Warren's wildlife adapt to the challenge of a warming climate."

Derek Butcher, from Network Rail's Southern Region, said: "We're privileged to be custodians of the Folkestone Warren – a geologically active landscape that our railway was built through in the 1840s. We need to look after it properly to preserve its incredible species. Bringing in natural grazing is a sustainable way of doing that, meaning less noise, less pollution and less need to put people at risk by having to maintain steep slopes."

Network Rail funded the goats through its Green Fund, which exists to invest in environment and social sustainability projects in the Southern region, driving outcomes like carbon reduction, biodiversity improvements and increased social value. The Network Rail team arranged for the goats safe arrival on a carefully marked out route to stop them accessing the railway – which is securely fenced off throughout the site. Conservation grazing isn't possible on the lineside to keep trains and goats safe from each other, and the electrified conductor rail.

Steff added: "While the goats are an exciting addition to Folkestone

Warren, we're keen that people respect that they have a job to do and leave them alone to live happily and graze the landscape undisturbed. Please keep dogs on leads when you're around the cliffs and the paths of the Warren."

The White Cliffs Countryside Partnership is looking for volunteers to help them as "Lookers" – an old Kentish term for country workers who watched over sheep and other livestock. Anyone interested in playing a role in the continued preservation of the Warren by watching out for the goats should get in touch via email to WCCP@dover.gov.uk.

Volunteers are welcome to help by looking as often or infrequently as they like, and all the training they need will be provided by the Rangers.

Network Rail's Suicide Prevention Programme marks key milestone with over 27,000 recorded interventions

On World Mental Health Day, October 10th, Network Rail has announced a new milestone with its Rail Suicide Prevention Programme as more than 27,000 interventions have been made across Britain's rail network.

Over the last year alone (2023-24), 1,937 interventions were made on the rail network in Britain through the support of the partnership which has been delivered through Network Rail, Samaritans and British Transport Police. The partnership aims to provide specialist training for rail staff, and partners to raise public awareness about suicide prevention, the signs to look out for to see if someone needs help, and teaches them the best ways to approach vulnerable people and these can range from simply talking to them or calling for further professional assistance.

Louise McNally, Network Rail's suicide prevention lead, said: "It's a great achievement to see that over 27,000 potentially life-saving interventions have been made to help support and identify vulnerable people across the rail network who may be at risk of suicide.

The Rail Suicide Prevention Programme helps us, as an entire industry, respond as effectively as we can to the many people that are presenting on the railway either in distress, in crisis, or struggling to cope. It also provides invaluable support to those members of the workforce who find themselves involved in some difficult incidents."

Network Rail continues to work closely with the Samaritans to train thousands of frontline railway staff with the skills to identify vulnerable individuals and confidently intervene.

Dave Brown, Samaritans senior programme manager for rail, commented: "Our partnership with Network Rail has been running for over 14 years and the impact it has had on saving lives has been huge. By equipping rail staff with the knowledge and confidence to help vulnerable people in distress, we ensure lives are saved each year."

To date, more than 30,000 rail employees and British Transport Police officers have been trained in suicide prevention techniques through the Samaritans' 'Managing Suicidal Contacts' course. This training has enabled staff to recognise the signs of someone in distress and offer assistance in critical moments.

Network Rail's Dom Mottram, knows the importance of looking out for others after he experienced suicidal thoughts aged 19 and was considering taking his life when a lady approached him and asked him a question – her kindness "snapping him out of harming himself in the moment". Dom has since gone on to do the 'Managing Suicidal Contacts' course with Samaritans and has helped others in a similar situation, both in and out of the rail environment.

Dom said: "I'm thankful for the ripple effect of that lady saving my life – without her stopping and checking if I was okay, I might not be here to now look out for and save others. With the support of family and friends I've come a long way since my 19-year-old self and applying my training with Samaritans to potentially life-saving scenarios has been incredibly rewarding. If I see someone who doesn't seem ok, I often go over and ask if they're alright and try and bring them to a place of safety. It's so important that we look out for one another each and every day."

Did you Know - Ken Mumford

Some more of the nations oddities this month:

The Midland and South Western Junction Railway

The Midland and South Western Junction Railway was an independent railway built to form a north-south link between the Midland Railway and the London and South Western Railway in England, allowing the Midland and other companies' trains to reach the port of Southampton

When the M & S W J. Railway was opened, an excursion was run from Cheltenham for visitors to the Chedworth Roman Villa, but the excursionists were refused admission - was this because Lord Eldon [when Earl Eldon, in 1864, discovered the remains of a Roman villa on his extensive land] was extracting revenge for damage done to his property during the construction of the line.

Navvies lived and worked hard on the construction of the M & S W.J line cutting at Chedworth in 1889. They kept the local court quite busy handling charges of drunkenness, fighting, poaching, trespass and theft.

Dieselisation using GWR railcars were tried. In 1936, such a railcar was seen at Chedworth but such motive power did not attract sufficient traffic - it only lasted one year.

Unique Lesmac Arrow Motorised Trolley and Bance Alumi Cart 2nd Generation Two-Seater Trolley

On July 12th, the Trust received a call from Ecclesbourne Valley Railway asking whether the Trust were interested in this Trolley, that they were looking to dispose of.

The Trust's board discussed this and by the July 17th, a deal had been agreed for it to join our fleet.

Our generous supporters at Lesmac (Fasteners) Ltd have supplied us with documentation for the Trolley as well as some original video clips of it being demonstrated. With the EVR focussed on a number of events, it was agreed that collection would be delayed until after their main season. Andrew Briddon has kindly agreed to collect the Trolley for the Trust, and it will initially be stored at his Darley Dale site.

The Trolley was built in 2010 and is Lesmac Works No. LMA001. It was fitted with a Honda GX200 RHQ4 engine. Once the Trolley has been collected, a full survey will be

carried out to ascertain what work is required to return it to service.

The Trust is interested in any other photos and videos of the Trolley. If anyone has any, please contact the Trust. The Trust continues to appeal for funds towards the £10k target we set ourselves last year and hopes that as we are able to share more positive news, more donations will be forthcoming to enable us to move more of our collection to our secure locations, provide further suitable storage accommodation for some of our older & more historic vehicles and make some significant progress on several restoration projects.

Photo: ©Paul Moseley - dated April 29th 2015

In February 2024, our Chair was contacted by a private individual who had acquired a Trolley which had long been assumed to have been scrapped. The Trolley in question is Bance Alumi Cart 2nd Generation Two-Seater Trolley – Works No. 080 of 1999.

This was supplied to a company called Laser Rail in mid-1999 and was a non-standard vehicle made for a customer to fit their own instrumentation.

Our friends from <https://www.ontrackplant.com/> advised that this Trolley was originally paired with a Geismar ECG7-C Track Geometry Measuring Trailer – Works No. C/99/013. The fate of the Trailer is unknown, but again it is assumed to have been scrapped. (If anyone has any pictures or information about this, we would obviously be interested to hear). Our Chair, tried to assist the private individual with finding a new home for the Trolley but without success. However, the Trust has been in contact with Anglesey Central Railway Ltd. (<https://www.leinamlwch.co.uk/>) since early 2019 and during discussions with them in June this year had been advised that they were now able to use a powered Trolley on the line.

The Trust Board had a discussion and decided that this was a great opportunity to further part of the aims of

the Trust. A deal was agreed by which the Trust would purchase the Trolley along with a Permaquip Link Trailer and they would then be placed on a Run & Maintain Loan with ACR Ltd. So, in early August, the Trust paid a deposit for the vehicles and on October 25th, ACR Ltd. collected them from their former owner and transported them to Anglesey. They are currently held at a secure private site awaiting the provision of suitable covered secure accommodation at ACR Ltd.'s site at Llangwyllog Station.

The Trust is interested in any other photos and videos of the Trolley. If anyone has any, please contact the Trust. The Trust would like to thank Roger Bance of R. Bance & Co. Ltd. (<https://bance.com/>) for the information his has supplied and his ongoing support. The Trust continues to appeal for funds towards the £10k target we set ourselves last year and hopes that as we are able to share more positive news, more donations will be forthcoming to enable us to move more of our collection to our secure locations, provide further suitable storage accommodation for some of our older & more historic vehicles and make some significant progress on several restoration projects.

Photo: ©SB Rail Photography - dated October 25th 2024

Perfect for diners who are looking for that unforgettable experience to share with family and friends, the Great Central Railway festive first-class dining offers four delightful courses served on board a first-class carriage drawn through the gorgeous Charnwood countryside by a heritage steam locomotive. Look out over a quintessential wintery scene as you savour high-class food and drink with dining dates and events available to book from November 23rd through to the New Year.

Join us on Christmas Day itself for an experience you and your loved ones will never forget with a gloriously

indulgent six-course feast. All served while you immerse yourself in the spellbinding feeling only heritage steam locomotives can bring. Tickets will go fast so book today!

Beyond the 25th, join Great Central Railway on Boxing Day Special and New Year's Eve Celebration for more unforgettable experiences. Don't fill up too much on Christmas Day, because the Boxing Day feast offers diners 5 courses of incredible food for them to drink, eat and be merry as they travel through the Charnwood countryside.

Ring in the New Year in the ultimate style on the Great Central Railway, with a 6-course meal and copious amounts of bubbly! Be aboard the first-class dining car as the clock ticks over, returning to Loughborough Station by 12:30am.

For more information and to book, please visit: <https://www.gcrailway.co.uk/christmas-dining-services-2024/>

Christmas Jubilee dining

November 23rd – December 22nd

Embark on a magical journey this holiday season with the Christmas Jubilee First Class Dining Service. Departing from Loughborough at 1pm, indulge in a four-course festive lunch crafted from the best seasonal ingredients, rounded off with tea or coffee and hand finished mince pies. All as a heritage steam locomotive carries you through the scenic Charnwood countryside.

The Christmas Forester

November 23rd – December 22nd

Spend a wonderful evening being whisked along by the famous Sherwood Forester steam locomotive and enjoy the ultimate in civilised festive dining. Five fabulous courses await including the best of and an unmatched atmosphere as the twinkling lights of Charnwood drift past in the background. The Christmas Forester departs at 7pm sharp on select dates throughout the festive period.

The Christmas Midlander

December 6th, 13th and 20th

The full traditional Christmas dinner with family and friends expertly prepared and with the irresistible addition of heritage railway magic. Tuck into your turkey in an experience to remember, including a special scenic pause on Swithland Viaduct to let you take in the reservoir in all its wintery glory.

Christmas Murder Mystery

December 6th, 13th and 20th

Prefer your dinner with a thrilling twist? Murder is in the air on this special festive-themed murder mystery train, 'Christmas to the Sound of Slay Bells'. Enjoy a delicious three-course meal while ruminating on whodunnit as you wind your way along the Great Central Railway.

Tickets for all events currently on sale are expected to sell out quickly, so pre-booking is strongly advised. To book your tickets and find out more information about all the events on offer at Great Central Railway, please visit: <https://www.gcrailway.co.uk/christmas-dining-services-2024/>

Corporate Fine Dining

Dining cars for Great Central Railway will also be available to book for business parties, corporate events and team outings this festive period. Please see the website for more details.

Celebrate Christmas with Great Central Railway and create memories that will last a lifetime!

Wensleydale Railway completes major track repairs as part of plans to restore passenger services to Redmire

Our goal to return to Redmire in 2025 is an ambitious one and we face a few challenges ahead. However, we are determined to succeed and will shortly be focusing our attention on the section of track west of Wensley Station towards Redmire Station.”

Nick Keegan, Fundraising and Marketing Manager at Wensleydale Railway said: “The response to our latest fundraising appeal has been excellent and demonstrates not only the incredible generosity of people, but also their genuine desire to see this beautiful scenic section of our railway once again carrying passengers.”

He added: “I would like to thank everyone who has donated and made this work possible. We very much rely on the kindness and generosity of our charitable Trust members, shareholders and the general public to keep our community railway running. Your support is greatly appreciated.”

Toby Lampitt, Director of Lampitt Rail Services said: “I was very pleased to be able to support Wensleydale Railway and their plans to restore passenger services to Redmire Station. This project was completed over a 5-week period, and I look forward to providing further support to the railway in the future.”

Photo: ©Lampitt Rail Services.

Wensleydale Railway has announced that it has successfully completed essential track repairs as part of its on-going plans to restore passenger services to Redmire. Work began in mid-September on a 0.75-mile section of track at Wensley, close to the site of the former Wensley Station. The earthworks which carried the railway along the foot of the cliffs below Leyburn Shawl had eroded and material fallen into the adjacent fields. Some sleeper ends were left exposed and unsupported.

The railway hired the services of a specialist railway contractor, Lampitt Rail Services, to undertake the repair work, with support from its operations staff and infrastructure volunteers. The work included rebuilding and widening sections of eroded embankment and

slewing some of the track into a more stable position.

The railway currently runs services from Leeming Bar to Leyburn. The 5.5-mile section of railway between the Georgian market town of Leyburn to Redmire village has been closed to the public since 2020. This has been due to the deteriorating condition of the track and infrastructure on this section of the railway.

Some of the track is life-expired and dates back to before the First World War. Wensley is located approximately half-way between Leyburn and Redmire.

Wensleydale Railway has set itself the goal of re-opening the line between Leyburn and Redmire stations by September 2025. This is to coincide with the 200th anniversary celebrations of the World’s first passenger service on the Stockton & Darlington Railway in 1825. In support of this goal and focused on the Wensley track repair work, The Wensleydale Railway Association (Trust) launched a fundraising appeal in July 2024 that has raised approximately £37,000 to date.

Russell Lord, Director of Infrastructure at Wensleydale Railway PLC said: “Completing this project is a major step forwards in our plans to restore passenger services to Redmire.

Santa Express returns to Great Central Railway for 2024!

The much-loved family tradition is returning this festive season, ready to once again delight children from across the Midlands and beyond.

The Great Central Railway is excited to announce the return of the ever-popular Santa Express as contract negotiations with Old St. Nick have finally succeeded (a few more mince pies sealed the deal!)

Running from November 23rd through to Christmas Eve, Great Central Railway's famous heritage steam locomotives will puff passengers along on a magical journey through the gorgeous vintage Loughborough Station before winding its way through the wintry Charnwood countryside to Leicester North before returning to Loughborough with a very special passenger on board... along with a few of his helpers of course!

This year, the Express is excited to include a special stop along the Swithland Viaduct to allow passengers to take in the gorgeous views over pristine scenery and active wildlife.

Little ones are sure to be delighted by Great Central Railway's specially curated Christmas Activity Pack, filled with games, puzzles, and colouring sheets. Santa will of course be making an appearance, and he knows how to spread magic, happiness and cheer.

Every child on board will receive a special Christmas gift from the man himself (as long as they aren't on the naughty list of course!) and each child will receive a drink and treats onboard as well as a goody bag full of festive cheer to take home. Adults are far from forgotten and will be treated to mince pies and Irish cream liqueur and there's a full at-seat bar service available to help you celebrate in style.

Private Carriages

For families or groups looking to go that extra mile this year, private carriages are available that will give the lucky children a private audience with Santa – so that they can really go into detail on exactly what they want for Christmas and the adults can capture it all on film.

Other special upgrades include delicious hot chocolates, customized Santa Express mug keepsakes and tasty chocolate novelties.

Tickets for the Santa Express are available to book now both for standard class and for private carriages. Santa Express tickets are always popular, so families are advised to book soon to avoid disappointment!

Find booking dates and more details on the Great Central Railway website: <https://bit.ly/SantaExpress2024>

HARMAN'S CROSS STATION VOLUNTEERS DONATE SURPLUS WOOD TO SWANAGE COMMUNITY CARPENTRY CLASSES

Dedicated and caring volunteers who maintain the Swanage Railway's award-winning heritage station at Harman's Cross - which has been built from nothing since the late 1980s - are donating surplus off-cuts of wood to a community group for use in its carpentry classes. The National Lottery funded Durlston Pleasure Grounds project in Swanage supports 'The Shed' - located at the Victorian Durlston Castle - which is an accessible centre for the local community enabling people of all ages and abilities to socialise, learn new skills and volunteer in supporting the Durlston Country Park and its acclaimed National Nature Reserve.

Bob Bunyar, the Swanage Railway's volunteer manager at Harman's Cross station, said: "Throughout the year, we work hard to maintain the wooden heritage buildings at Harman's Cross, as well as wooden fencing, so there are always off-cuts of wood that previously would have been burnt. We are delighted that our off-cuts of wood are not wasted and are instead being donated to 'The Shed' at Durlston Country Park to help with its community carpentry classes and activities which

is a very worthwhile, positive and practical cause. It's very pleasing to know that we are able to help another voluntary group in the Isle of Purbeck after the suggestion to donate our surplus off-cuts of wood from my wife Suzanne when I told her we had to clear out a timber store at Harman's Cross station," added Bob who has been a dedicated Swanage Railway volunteer for more than 30 years and lives in Swanage.

The son of Harman's Cross station volunteers Terry and Judy Tovey is a regular user of 'The Shed' where he puts his wood working skills to good use in making items - such as bird feeders, bug houses, key tags and other wooden gifts - for sale in the Durlston Castle shop and at various fairs, including the Swanage Christmas Market in December. Terry and Judy's son also occasionally helps his parents with maintaining the gardens at Harman's Cross station which regularly draw admiring praise from train passengers.

Swanage Railway Trust chair Frank Roberts said: "As a resident of Swanage for 40 years, I have always

endeavoured to support the wider community in the Isle of Purbeck so I am delighted that this new initiative has proved to be of mutual benefit to our dedicated volunteers at Harman's Cross station and at Durlston. These are difficult times for many people and organisations so the Swanage Railway will continue to support recycling moves to help other local groups," added Frank who lives in Swanage and has been a dedicated Swanage Railway volunteer for 40 years.

Most people think Harman's Cross station has been in existence since the Wareham to Corfe Castle and Swanage branch line was built in the 1880s but it only started to be built by dedicated volunteers in the late 1980s when the Swanage Railway's relaid tracks arrived at Harman's Cross.

Bob Bunyar explained: "Maintaining Harman's Cross station is like the Forth Bridge in Scotland, there is always painting and maintenance work to do. It's a continual effort by our dedicated and good humoured team of volunteers to keep the station looking good and

we always start out day with a cup of tea! The station gardens are also a big asset and last year we were awarded a Silver Gilt in the Community Rail Gardens Competition which covers railway stations in the south west of England - from Cornwall through to Hampshire - and we were also awarded a Royal Horticultural Society award for the management of our gardens. We have projects to do now the main peak heritage train operating season is over and new signage is being made for the station booking office, waiting room and platform numbers. A recent job was the renovation of our station lights where the metal work had rusted on five lamp heads and needed replacing," added Bob who lives in Swanage.

The friendly Harman's Cross station team always welcome new volunteers and meets on Mondays and Wednesdays from 10am until 2pm. Anyone interested is welcome to visit the station on those days to have a look and enjoy a chat.

East Lancs Railway

Standard BR Class 9F No. 92134, visiting the East Lancs Railway, makes light work of the five coach Heywood to Bury service as it approaches Ewood Bridge on October 25th. *Lee Stanford*
